

App Password Setup Guide

Follow these simple steps to fix your website contact form

Please follow the steps below carefully. It will only take 2 minutes. Once done, please send me the password shown in Step 4 and I will complete the setup immediately.

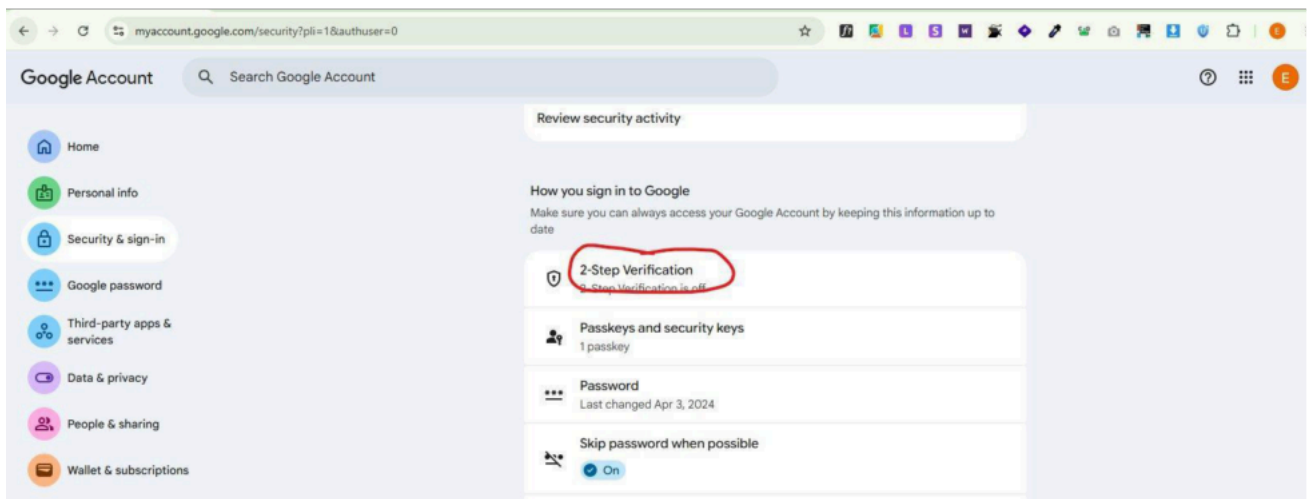

STEP 1—Open Google Account Security

Open your browser and go to:

myaccount.google.com/security

Make sure you are logged in with your email: superior62901@gmail.com

You will see '2-Step Verification'—click on it (circled in red in the screenshot below):

STEP 2—Turn On 2-Step Verification

If 2-Step Verification is OFF, you will see a blue button. Click it and follow the on-screen steps to turn it ON.

i If it is already ON, skip this step and go to Step 3.

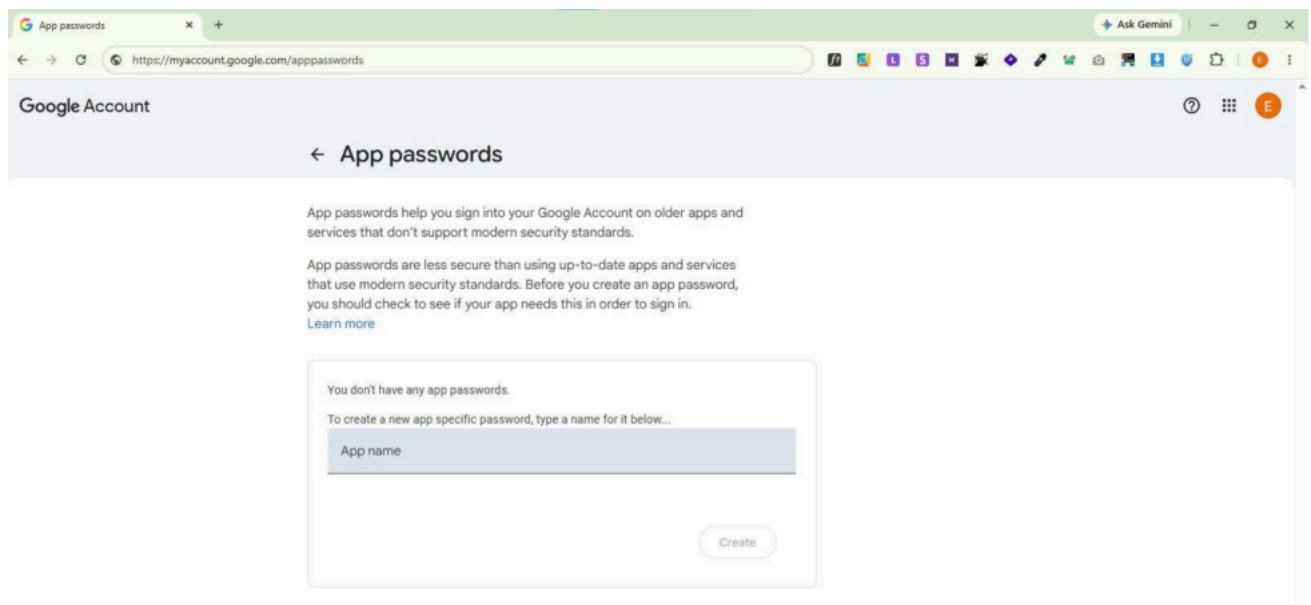

Now open this link in your browser:

myaccount.google.com/apppasswords

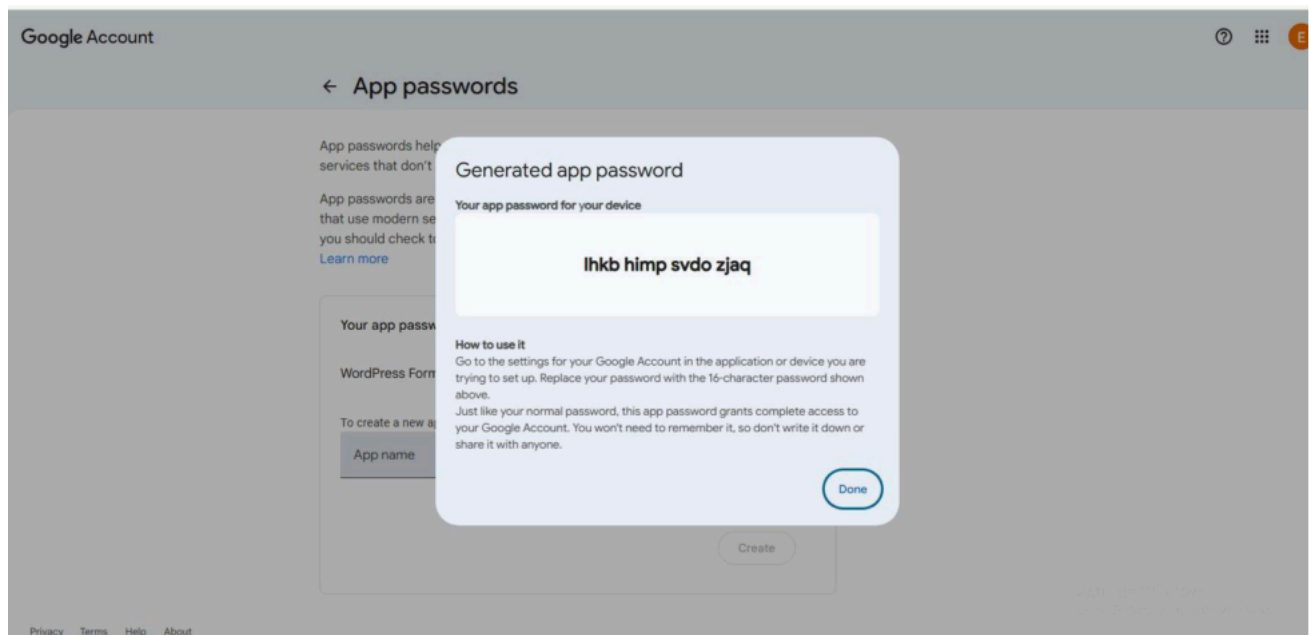

In the 'App name' field, type: WordPress

Then click the 'Create' button.

STEP 4—Send Me The Generated Password

A popup will appear with a 16-character password as shown below. Please copy it and send it to me

⚠ IMPORTANT: Please do NOT close or remove anything after sending me the password. If the connection is removed again, the form will stop working.

i Once I receive the password, I will complete the setup and your contact form will be fully working.
